Roemer's Giant Striped Pansy.

The success my Pansy Seed has met with for many years past has induced me to still further improve the selection this year, by calling upon the leading European specialists for their choicest prize strains, so that for size, beautiful colorings and markings, it will be difficult to surpass it. The seed offered here is warranted fresh, and should be sown during the months of July and August to produce the largest and grandest flowers next season.
